

TESTIMONIAL IN RESPECT OF THE PM CLINICAL LEADERSHIP IN PHARMACY PROGRAMME HELD IN SCOTLAND IN 2016 AND 2017

Would you like to enhance your current Leadership skills?

Would you like to invest 12 days in working with a great bunch of fellow pharmacists?

Would you like support getting ready for your next promotion, role or project?

If your answer is YES to the above questions then the Pharmacy Management Clinical Leadership in Pharmacy Programme is for you.

I have been lucky enough to have been on the first cohort of this programme and as a result have gained the following and more.

1. New Leadership models and skills that were shared in a practical way.
2. More evidence for my second Faculty Submission.
3. Quality conversations with people I would not normally come into contact with e.g. Director of Pharmacy, Scottish Govt personnel, Other Healthcare professional Leads.
4. A relaxed and collaborative atmosphere created on each day by the course facilitator.
5. Key Leaders in Pharmacy working with the group.
6. A greater understanding of primary and secondary care and multidisciplinary teams.
7. New colleagues and developed new friendships.
8. The opportunity to complete a Project in a subject I am passionate about.
9. The challenge of producing a Poster about my project and presenting it.
10. Being clear on what I want to do to take my professional career ahead.

I would have no hesitation in recommending this programme to any Pharmacist no matter what stage they are at in their career.
